**VFX Seminar Review**

Taking Dawn's VFX Seminar was eye opening. She made it easy to understand the complex and important elements of what makes up VFX and also what our duties as script supervisors are when it comes to our daily notes and how we understand what the camera sees.

Our notes are even more crucial than usual for the editor and although they are similar to our normal note taking, there are additional and very important elements that are written a certain way and in certain technical terms.

Dawn also created a guide to accompany the video so that we can follow her, take notes and highlight key points. She went over every important point in fine detail and made it easy to understand those points as well as the big picture.

Thank you Dawn, for an awesome seminar! I feel even more confident that VFX is now part of my skillset.
